

Training Program on online system for subsequence surveys under the Title Registration Act No.21 of 1998

Maintaining a land information database is one of the functions assigned to the Surveyor General under the Survey Act No. 17 of 2002. Accordingly, this LIS is already maintained and all survey data conducted under the Title Registration Act will be stored there.

The online system (TLDMS) has already been introduced to create TL and store the land information in LIS. The survey department has already introduced an online system for subsequence surveys under the Title Registration Act and it is used by the Registered Licensed Surveyors.

But it has identified some Registered Licensed Surveyors still not use the System and therefore, the Department has organized an online training program to introduce the system to the surveyors who are not yet familiar with it.

Therefore, the Registered Licensed Surveyors willing to enroll in this training program can register on or before 2021.10.01 using the following link.

Please note that It will be mandatory of use of this program for subsequence Surveys.
